## The Mango Loa Project

Improving Hawaii's Mango Industry By Using Ultra High Density Plantation (UHDP)

Techniques And The Open Tatura Trellis System.

## An on-farm field day to demonstrate UHDP and open tatura trellis system techniques for commercial orchards

Saturday January 26, 2019

10:00a.m.-2:00p.m.

Umi's Farm

Kekaha, Kauai

We will gather on the mauka side of Kekaha road in front of the Kekaha sugar mill

- Open to everyone: Farmers, educators, and enthusiasts
- **Tour of the field:** We will tour and discuss advantages and disadvantages of implementing UHDP techniques, open tatura trellis systems, and traditional orchard layouts. We will also go over the costs of installation and increased production potentials.
- Potluck: Bring a dish and join us for lunch.
- Hawaii Tropical Fruit Growers Kauai Meeting: There will be a chapter meeting following the demonstration.

Field day is free Contact for information: Umi Martin 808-652-0082

Dress for the farm; shoes are recommended Email: Umisfarm@gmail.com
